It was truly an honor to have access to the tools made in the name of helping so many designers around the world. I wish all those people success and happiness in their work, and I look forward to keeping an eye on the progress of GIMP, which I've found to be a tremendous community and boon to the graphics industry. Over the past decade, the GIMP team has seen a fair amount of changes. In celebration of the second decade of the GIMP project, we have been gathering a set of reminiscences of the past 10 years of GIMP. If you are interested in reading a bit about our past and current state as a project, please take a look at section 1, 2 and 3 of the history. Tips for reading the history section can be found in section 4.1. When you are ready to bookmark the pages, the reposted version of the history page also includes a list of the top ten relevant entries in the past 10 years. I completed it today, so if you know yourself the ten most relevant entries, I'd be very happy to receive a pull request to update the page. The address to the current version of the history page can be also found in the GIMP documentation. The following list shows 10 Photoshop features:
