You can now export and import to any photo hosting site (imgur, photobucket, Facebook, etc.) - You can export a chosen photo from within the app by just selecting it from the main screen. - Some bugs have been fixed.^{23]}^ In the present study, patients receiving NIV showed a more significant reduction in serum albumin levels than those receiving CVCV. Serum albumin levels in all patients were not significantly decreased after adjusting for age, sex, severity, Acute Physiology and Chronic Health Evaluation (APACHE II) II score, mechanical ventilation days, pneumonia type, and vasoactive

drug use. However, in the subgroup analysis of patients with influenza infection, serum albumin levels were more significantly decreased in patients receiving NIV than in those receiving CICOV. The present study also revealed that, in a multivariate logistic regression model, the use of NIV and vasoactive drug use were significantly associated with the development of MODS. These findings are consistent with those of previous studies.^{[@bibr17-030006051881923][@bibr18-030006051881923]--[@bibr19-030006051881923]} Additionally, when we selected

patients who did not receive vasoactive drugs from the whole cohort, the associations between NIV use and MODS, and vasoactive drug use and MODS, remained statistically significant. Previous studies have shown that the incidence of acute respiratory distress syndrome in patients with influenza was 4.9% to 5.5%,^[@bibr19-030006051881923],^[@bibr20-030006051881923] and the incidence of MODS was 2.5% to 3.3%.^[@bibr20-030006051881923]^[@bibr21-030006051881923]--^[@bibr22-030006051881923] In the present study, the incidence of

MODS was 3.9% and the incidence of MODS-related death was 13.1%. These data are similar to those of previous studies. In patients with influenza-associated ARDS and MODS, patients receiving C
