Drew McDowall, 1. Dental Resources Dental Treatment A healthy smile is one of your most important assets. This gives you confidence and makes you more attractive. The more your teeth are healthy, the more your smile will look natural. The new Smile Gallery at Kingston Dental will give you a way to show off those perfect pearly whites. Maintaining healthy teeth is easier and less expensive than getting them fixed. We can help you know when it is time to see the dentist, and we can work with you to find solutions to prevent tooth decay and gum disease. We offer a range of oral health services, including: Dental sealants Wisdom tooth removal Dental implants Root canal treatment Complete exam, cleaning and fluoride treatment Pain-free tooth extraction and extraction of wisdom teeth Preventing tooth decay It's never too late to get your teeth checked. We can use x-rays to help determine if you have cavities and recommend treatment that can help you prevent them in the future. If you are already dealing with tooth decay or gum disease, we can help you find solutions to these problems. Some patients with severe decay or gum disease may need to undergo a more extensive procedure, such as a root canal. If you have any questions about this procedure, please contact us for a consultation.

How to avoid tooth decay: Brush your teeth regularly and thoroughly. Make sure to brush your tongue and the back of your throat. Don't use hard or sticky foods. If your child is old enough to have a seat at the table, have them use a soft-bristled toothbrush. Your dental team will discuss with you the best way to take care of your teeth and gums.

How to treat tooth decay: The best way to treat tooth decay is to prevent it from happening in the first place. You can help prevent tooth decay by keeping your teeth clean and by maintaining a healthy diet. Tooth decay can also lead to serious health problems if left untreated. Your dental team can help you choose the best treatment plan that is right for you.

How to remove teeth: Preventing tooth decay is the best way to get rid of teeth. However, sometimes a tooth has to be removed because of a serious infection. You may need to have one or
